
[Oil: The Earth's blood](#)

"The oil flows, the Earth bleeds" is the title of this Oilwatch publication. Oilwatch is an international network that supports the struggle of local communities and indigenous peoples facing oil industry activities in the tropics.

The book presents a broad variety of examples of oil activities and resistance in Latin America (Ecuador, Colombia, Honduras, Peru, Guatemala, Bolivia, Brazil), Africa (Nigeria, Chad, Cameroon, Ghana), Asia (Bangladesh, India, Thailand), as well as general articles on the issue.
