
[Petition: Brazilian Gov't Must Reject Genetically Engineered Eucalyptus Trees](#)

By The Campaign to STOP GE Trees. Sign below to insist CTNBio not approve GMO Trees!

On Thursday 5 March, the Brazilian Biosafety Commission (CTNBio) was scheduled to decide whether to approve the commercial release of GE trees developed by FuturaGene. This meeting was cancelled after it was disrupted by activists, and after FuturaGene's operations were taken over by 1,000 women earlier that same day.

Now we need your help again. The CTNBio meeting has been rescheduled for the 9th of April.

[Sign the petition to show your solidarity with those fighting GE trees in Brazil, and to tell the Brazilian Biosafety Commission to REJECT GE trees.](#)
