
[21 September | Videos: Plantations are not forests!!](#)

WRM releases five short videos which shows why industrial tree plantations are not forests.

The first one is about the impacts of large-scale tree plantations in general. The other remaining four focus on specific topics: oil palm plantations, pulpwood plantations, impacts on water and certifications.

The videos are available in two formats:

- On the WRM YouTube channel, to share on web sites, social networks, via e-mail, etc.
- Versions in low resolution to download and share via WhatsApp and Telegram and for use in locations with slow Internet connection.

Versions in low resolution
